SECTION 1

Before you start

This guide shows what your customers see: your public website, their dashboard, and every page they use to deposit, invest and withdraw. Section 13 then shows, side by side, how the changes you make in the admin panel appear on the customer's screen.

The screenshots use a sample customer called Jade. Private details such as emails, links and wallet addresses are blurred.

GOOD TO KNOW

Customers never see the admin panel, the other customers, or anything you mark as internal.

SECTION 2

The public website

This is what anyone sees at your website address. It explains the platform, shows your live investment plans and a return calculator, answers common questions, and has a contact form.

Figure 1. The top of the public website.

- The words and pictures come from **Landing Page** in the admin panel. See Section 13 for an example.
- The plan cards and the calculator always use your real plans from **Investment Plans**.
- Messages sent with the contact form arrive in **Contact Messages**.
- The pop-up in the corner comes from **Social Proof**.

Creating an account

Visitors click **Get Started** or **Create free account**.

- 1 They enter their full name, email address and country, and choose a password.
- 2 They tick the box to accept your terms and click **Sign Up**.
- 3 They get an email with a confirmation link and click it to activate the account.

Your Capital, In Full View

Track deposits, investments, and withdrawals with real-time, server-validated balances. No guesswork, no hidden numbers, just a transparent dashboard.

Figure 3. The sign-in page.

SECTION 3

The dashboard

After signing in, customers land on their dashboard.

Figure 4. The customer dashboard.

Card	What it shows
Total balance	Everything they hold: available money, money in plans and any bonus.
Total invested	Money in plans that are running.
Available balance	Money they can invest or withdraw now.
Total earnings	Everything their plans have earned so far.

The menu on the left takes them to My Wallet (with Account, Deposit and Withdraw), Transaction, Plans, My Investments, Notifications, Support, Settings and Log Out. The bell and envelope icons at the top open their latest notifications and support chats.

Market Overview chart

The chart shows how a market has moved. Customers switch between **Week**, **Month** and **Year**, and pick a market from the menu on the right. The Platform Index is shown first.

Figure 5. The Market Overview chart.

- **Index value** or **Live price** is the current value.
- **24h change** is the change over the last day. Green means up and red means down.
- The line and the markets in the menu are controlled from **Market Controls** in the admin panel.

Portfolio Composition

A ring chart showing how the customer's invested money is split between their plans.

Figure 6. Portfolio Composition.

My Wallet and Account

My Wallet shows the four balances, a market chart and recent wallet activity, with quick buttons to deposit or withdraw.

Figure 7. My Wallet.

Account shows the customer's profile card, their plans, wallet activity and a market trend chart.

Figure 8. Account.

SECTION 5

Depositing money

Customers open **My Wallet** and then **Deposit**. What they see depends on how you take payments.

With PayRam (automatic)

Figure 9. The deposit page when PayRam is connected.

- 1 The customer types the amount in US dollars and clicks **Continue**.
- 2 A PayRam payment page opens in a new tab. It shows the coin, the network, the wallet address and a QR code.
- 3 The customer sends the crypto from their own wallet.
- 4 When the payment arrives, the deposit is confirmed by itself and the money appears in their available balance. They get a notification.

With your own wallet addresses (manual)

The screenshot displays the 'Deposit' page in the Investo mobile application. On the left is a dark sidebar with a navigation menu including: Dashboard, My Wallet (selected), Account, Deposit, Withdraw, Transaction, Plans, My Investments, Notifications, Support, Settings, and Log Out. At the bottom of the sidebar is a prompt: 'Want higher returns? Upgrade your plan'. The main content area is titled 'Deposit' and features a 'Deposit Funds' form. The form includes the instruction 'Add funds to your balance to start investing.' and three input fields: 'Amount (USD)' with the value '0.00', 'Currency' set to 'USDT', and 'Network' set to 'ERC20'. A 'Continue' button is located at the bottom of the form. The top right corner of the app shows the user's profile: 'Jade Fawn' and 'Client'.

Figure 10. The deposit page when you use your own wallet addresses.

- 1 The customer types the amount and chooses the coin and network.
- 2 They click **Continue** and see your wallet address and a QR code.
- 3 They send the crypto. The deposit shows as Pending.
- 4 You check that the money arrived and confirm it in the admin panel. The money then appears in their balance and they get a notification.

SECTION 6

Withdrawing money

The screenshot shows the 'Withdraw' page in the Investo app. On the left is a dark sidebar with a navigation menu. The main area is white and titled 'Withdraw'. It features a 'Withdraw Funds' card with the following details: Available balance: \$1,092.00; Withdrawals are reviewed before funds are released; Minimum withdrawal: \$50.00. The form includes an 'Amount (USD)' input field with '0.00', a 'Currency' dropdown set to 'USDT', and a 'Network' dropdown set to 'TRC20'. A note states: 'Payouts are sent in USDT only. Choose TRC20 (Tron) for the lowest network fee, about \$1.' Below these is a 'Destination address' input field labeled 'Wallet address' and a 'Request Withdrawal' button.

Figure 11. The withdraw page.

- 1 The customer opens **My Wallet** and then **Withdraw**.
- 2 They type the amount. The page shows their available balance and the smallest amount they can withdraw.
- 3 They choose the network: **TRC20** (Tron, about \$1 fee) or **ERC20** (Ethereum, a higher fee). Payouts are in USDT only.
- 4 They paste their own wallet address and click **Request Withdrawal**.
- 5 The amount leaves their available balance and the request waits for you. When you pay it, they get a notification with the details.

LIMITS CUSTOMERS SEE

Customers without an approved ID check can withdraw up to \$150 in total. The page tells them how much they have left and links to Settings to verify their identity.

SECTION 7

Plans and investing

Plans lists every active plan with its rate, deposit range and length.

Figure 12. The Plans page.

- 1 The customer clicks **Invest** next to a plan.
- 2 A panel explains the plan, including the rules for moving earnings and ending early.
- 3 They type an amount within the plan's range and click **Confirm Investment**. The money comes from their available balance.

Figure 13. Investing in a plan.

SECTION 8

My Investments

Every plan the customer has bought, with its amount, rate, status, dates and earnings.

Figure 14. My Investments.

Button	What it does
Move to balance	Moves the earnings shown as "Not yet moved" into the available balance, where they can be withdrawn or invested again. It works once the earnings reach the plan's minimum.
End plan early	Shows exactly what the customer gets back, then asks them to confirm. Before the halfway point they get their money back with no earnings. After the halfway point they get their money back plus half of the earnings.

When a plan finishes, the original amount and any earnings not yet moved go back to the available balance by themselves.

SECTION 9

Transactions

Every money movement on the account: deposits, withdrawals, investments, earnings and bonuses, with the balance after each one and its status.

The screenshot displays the 'Transactions' page in the Investo app. On the left is a dark navigation sidebar with options: Dashboard, My Wallet, Transaction (selected), Plans, My Investments, Notifications, Support, Settings, and Log Out. At the bottom of the sidebar is a prompt: 'Want higher returns? Upgrade your plan'. The main content area has a title 'Transactions' and a search bar 'Type to search ...'. Below this is a secondary search bar 'Search by reference'. To the right are buttons for 'Newest first' (with a dropdown arrow), 'Export CSV', and 'Print Statement'. The transactions are listed in a table with the following data:

Date	Type	Amount	Balance After	Status	Reference
10/9/2026 03:03 AM	Deposit	+ \$1,000.00	\$1,092.00	PENDING	DEP-a74b1c
10/8/2026 04:15 AM	Investment Yield	+ \$42.00	\$1,392.00	COMPLETED	YLD-0
10/8/2026 04:15 AM	Withdrawal	- \$300.00	\$1,092.00	COMPLETED	WD-3d9245
10/6/2026 03:15 AM	Withdrawal	- \$150.00	\$1,350.00	PENDING	WD-2eb3cf
9/14/2026 04:15 AM	Investment	- \$3,500.00	\$1,500.00	COMPLETED	INV-149654
8/30/2026 02:15 AM	Deposit	+ \$5,000.00	\$5,000.00	COMPLETED	DEP-7da19b

Figure 15. The Transactions page.

- The search box finds a transaction by its reference.
- **Newest first** changes the order.
- **Export CSV** downloads the list as a spreadsheet. **Print Statement** prints it.

SECTION 10

Notifications and pop-ups

Customers get a notification for confirmed deposits, paid withdrawals, started and finished plans, referral rewards, and every message you send them. The bell at the top shows how many are unread.

Figure 16. The Notifications page.

Small pop-ups also appear in the bottom corner of the dashboard and the website. They show example activity or real activity, depending on your **Social Proof** settings.

Figure 17. A pop-up about a person.

Figure 18. A pop-up about a coin, with its logo.

SECTION 11

Support

Customers open **Support** to chat with your team. They click **New Ticket**, choose a category such as Withdrawal, write a subject and message, and send it. Your replies appear in the same chat, and the status shows whether it is open, in progress or resolved.

Figure 19. The Support Center.

SECTION 12

Settings

Settings is where customers manage their profile, privacy, referrals, identity check and security.

Profile

Their name, email, account status and the date they joined. They can change their name here.

A screenshot of the 'Profile' settings page. The title 'Profile' is at the top left. Below it, there are two main sections. The left section contains a 'Full name' input field with the text 'Jade Fawn' and an 'Email' input field with a blurred address. Below these is a 'Save Changes' button. The right section displays 'Account status' as 'Active' and 'Member since' as 'August 20, 2026'.

Figure 20. Profile.

Activity privacy

Customers choose whether their own activity can appear in the pop-ups other visitors see, and how their name is shown: a nickname, their first name and last initial, and so on.

A screenshot of the 'Activity Privacy' settings page. The title 'Activity Privacy' is at the top. Below it is a descriptive line: 'Control whether your real activity (deposits, investments, and more) can appear in the "Recent Activity" pop-ups other visitors see, and how your name is shown when it does.' There is a checked checkbox for 'Show my activity in Recent Activity pop-ups'. Below this is a 'Nickname' input field with the placeholder 'e.g. Investor23' and a note: 'Only used when "Display as" below is set to Nickname.' The 'Display as' dropdown menu is currently set to 'First name + last initial'. At the bottom is a 'Save Privacy Settings' button.

Figure 21. Activity privacy.

Referral program

Each customer gets a personal link. **Copy Link** copies it so they can share it. Below are their referral count, earnings from referrals, and the people who joined with their link.

Figure 22. Referral program.

Identity verification

Customers upload a photo of an ID document and a proof of address, with their legal name and date of birth. The badge shows Pending, Approved or Rejected. If you reject it, they see your note and can upload again.

Figure 23. Identity verification while it waits for review.

Security

- **Two-Factor Authentication:** customers scan a QR code with an authenticator app and click **Verify & Enable**. From then on, signing in also needs a 6 digit code.
- **Active sessions** and the **Activity Log** show where and when they signed in.
- **Change Password** sets a new password.
- **Delete Account** sends a request to close the account to your support team, with an optional reason.

Figure 24. Account security.

What your changes do

Each example below shows a change made in the admin panel on the left, and what the customer sees straight after on the right.

2. WHAT THE CUSTOMER SEES

Market Overview

WeekMonthYear

● Index value \$45,662.51

● 24h change +3.44%

Platform Index

The index value now reads \$45,662.51 and the line jumps up at the end, then keeps moving from there.

Figure 25.

Lowering the Bitcoin price

1. IN THE ADMIN PANEL

Price customers see \$80,963.00	Live provider price \$81,963.00
Manual offset -\$1,000.00	Status Override active

Market Controls, Live markets, BTC/USD. Lowered by \$1000 with the By amount arrows. The status shows Override active.

2. WHAT THE CUSTOMER SEES

Customers who pick Bitcoin see \$80,963 instead of the real \$81,963. The line keeps following the real market, \$1000 lower.

Figure 26.

Hiding a market

1. IN THE ADMIN PANEL

Markets				
The markets customers can pick on their dashboard, wallet and account pages, in this order. Switched-off markets are hidden.				
				Add market
Market	Price source	Price	Shown	
BTC/USD Bitcoin	Live - bitcoin	\$80,963.00	☒	↑ ↓ Remove
ETH/USD Ethereum	Live - ethereum	\$2,483.03	☒	↑ ↓ Remove
XAU/USD Gold	Live - xau-gold	\$4,173.87	☒	↑ ↓ Remove
SOL/USD Solana	Live - solana	\$109.92	☐	↑ ↓ Remove
INV/USD Investo Coin	Simulated	\$1.25	☐	↑ ↓ Remove

Market Controls, Live markets. The Shown switch for SOL/USD is turned off.

2. WHAT THE CUSTOMER SEES

Solana is no longer in the customer's market menu. Turning the switch back on brings it back.

Figure 27.

Showing a projection to one customer

1. IN THE ADMIN PANEL

Chart projections			
When this customer asks to see a scenario, set it up here. It shows only on their account, labeled "Projection", and every change is recorded in the audit log.			
Chart	Scenario	Last changed	On for customer
Market Overview	Platform Index - continues the real line - +12% over 30 days - steady Edit	Oct 9, 04:23 AM	☒
Portfolio Composition	Not set up Set up	-	☐

SECTION 14

Questions customers often ask

Question	Answer
My deposit is still pending.	PayRam deposits confirm by themselves once the payment arrives on the blockchain. Manual deposits wait for you to check and confirm them.
Why can I only withdraw \$150?	Customers without an approved ID check can withdraw up to \$150 in total. They can verify their identity in Settings.
Why can I not move my earnings?	Earnings must reach the plan's minimum withdrawal amount first. My Investments shows how much has built up.
What do I get if I end my plan early?	Before the halfway point, their money back with no earnings. After it, their money back plus half of the earnings. They see the exact amount before confirming.
How long does a withdrawal take?	Every withdrawal is reviewed by your team before it is paid. Once paid, it reaches their wallet in a few minutes.
Which network should I choose?	TRC20 (Tron) has the lowest fee, about \$1. ERC20 (Ethereum) costs more.
What is the dashed line on my chart?	A projection you set up for them. It shows a possible path, not their real balance.
